MediAI Care+: Frontend Application Guide

Complete Technical Specification: Component Architecture, Views & Build Steps

Project Name:	MediAI Care+ Healthcare Decision Support System
Module Focus:	Standalone Web Frontend Architecture & Implementation
Tech Stack:	React 18, Vite 5.0, Tailwind CSS, Lucide Icons

1. Architecture Overview

The MediAI Care+ frontend is an interactive React 18 single-page application engineered for fast, intuitive medical decision support. It operates 100% client-side with zero backend dependency.

2. Core File Structure

File Path	Module Type	Key Responsibility
src/main.js	App Router	Hash router (#home, #analyze, #drugs, #outbreak, #performance).
src/views/homeView.js	Landing View	Hero section, status indicators, and disclaimers.
src/views/analyzeView.js	Analysis View	Interactive symptom checker & ML model selector.
src/views/drugsView.js	Drugs View	Pharmaceutical profile search & interaction matrix.
src/views/performanceView.js	Metrics View	Confusion matrices & cross-validation metrics.

3. Deployment Commands

- **Dev Server**: npm run dev (http://localhost:5173)
- **Build Production**: npm run build (Compiles to dist/)
- **Preview Build**: npm run preview -- --port 4173
