MediAI Care+: Frontend Web Application Report

User Interface Architecture, React Component Structure & Clinical UI Widgets

Module Focus:	Frontend User Interface & React SPA Architecture
Tech Stack:	React 18, Vite 5.0, Tailwind CSS, Lucide React
Live Access:	http://localhost:5173

1. Overview & Architecture

The MediAI Care+ frontend is an interactive React 18 single-page application engineered for fast, intuitive medical decision support. It renders patient vitals telemetry, real-time ML risk predictions, and an AI chatbot widget.

2. Modular UI Component Breakdown

Component	File Path	Primary Functionality
AIChatBot.jsx	src/components/AIChatBot.jsx	Interactive AI chat drawer with dynamic patient vitals context.
DiseasePredictor.jsx	src/components/DiseasePredictor.jsx	Symptom selector & ML disease risk calculator.
VitalsMonitor.jsx	src/components/VitalsMonitor.jsx	Real-time telemetry dashboard (HR, BP, SpO2, Temp).
AnalyticsDashboard.jsx	src/components/AnalyticsDashboard.jsx	Model accuracy charts & confusion matrix visuals.

3. Live Verification

Verified live on **http://localhost:5173/#chat** with zero console errors.
